

OUR PATH: FORWARD!

The election this autumn is the most important in some time.

We're living in a turbulent period in which more and more people are painting a bleak future – with the spread of distrust and xenophobia as a consequence. More than ever, we need to stand up for compassion, have the courage to see the opportunities and believe in the forces that drive humanity. It's become more important than ever to decide where we stand.

For us, the answer is clear. We want to go forward.

WHICH PATH WILL YOU CHOOSE?

Things are going well for Sweden in many ways. But not all. Integration is failing, healthcare queues are growing, emissions are increasing and Sweden is at risk of becoming a divided country.

We stand for a different direction entirely. Where others only see problems, we see potential. Where others choose xenophobia, we choose compassion. Where others see growth as a threat to the environment we see opportunities for new, green jobs. And where others spread apprehension, we create security.

Instead of following the path of growing extremism, we are choosing a different path for the whole of Sweden: forward.

WE WANT TO KEEP SWEDEN TOGETHER

Sweden is at risk to become a divided nation. One of the biggest divisions is between those who have a job and those who don't. We want more people to have the chance to work, participate and make their own living.

This is why we want to:

- Make it easier for people to get their first job.
- Make sure that it becomes less expensive for small businesses to employ staff.
- Make it simpler for companies to create jobs all over Sweden.

WE WANT TO CREATE SECURITY THROUGHOUT SWEDEN

Wherever you live in Sweden, you should be able to rest assured that healthcare and the police are available close by.

This is why we want to:

- Increase freedom of choice and shorten queues to healthcare.
- Give everyone the opportunity to designate a doctor to be in charge of their healthcare.
- Ensure zero tolerance against all forms of crime and increase the number of police in all parts of the country.

WE WANT TO INVEST IN GREEN GROWTH

Emissions are increasing and the climate is being impacted. We don't see growth as an environmental threat but as an opportunity for development and more green jobs.

This is why we want to:

- Ensure that Sweden switches to fully renewable power generation.
- Invest in eco-friendly fuels.
- Ensure that everyone is able to live without being exposed to toxins.
